

JAMES W. CAHILL, MD, FAAOS, AND SIVARAM RAJAN, MD, FAAOS

Using cutting-edge techniques and technology, Dr. Cahill and Dr. Rajan are part of one of New Jersey's premier sports medicine practices.

Dr. Cahill, in practice for fifteen years, performs arthroscopic rotator cuff and labrum surgery, and anterior cruciate ligament (ACL) reconstruction for adolescents and adults. He is an expert on cartilage repair in the knee, and also performs hip and knee replacements.

Dr. Rajan's expertise in sports medicine utilizes minimally invasive techniques to perform complex knee and shoulder surgery. He specializes in arthroscopic rotator cuff, SLAP, and labral repair; ACL and multiligamentous knee reconstruction; and total knee replacements.

"We emphasize comprehensive and personalized patient care," says Cahill, "Patients are seen by their operative surgeon throughout their pre- and postoperative course." Both doctors are board-certified orthopaedic surgeons, as is their colleague Warren A. Hammerschlag, MD, FAAOS, a fellowship-trained foot and ankle specialist.

HOSPITAL AFFILIATIONS: Hackensack University Medical Center; Hospital for Joint Diseases Orthopaedic Institute, New York City. MEDICAL TRAINING: Dr. Cahill: Columbia University; Albert Einstein College of Medicine; Hospital for Joint Diseases Orthopaedic Institute (fellowship in pediatric orthopedics and sports medicine); Dr. Rajan: Case Western Reserve University; SUNY-Stony Brook; University of Pennsylvania (fellowship in sports medicine).
